

Copy a project in Android 4

1. In File Manager copy the project directory and rename the new one
2. Enter in it and change application Id inside app/build.gradle
3. Open the setting gradle file and change the root project name to the new name
4. Open the existing new project in Android Studio
5. Right click on java folder -> "refactor" -> "rename"
6. Choose "rename package"
7. In the dialog choose "Scope: all places" and click "preview" or "refactor"
8. When done resync the gradle files.
