

# Submission Instructions

You are to create a short video showing your application working and being moved portrait to landscape. Upload that document to Blackboard.

In the write submission area, you must provide the link to your project on your GitHub page. I want the link to the project only not the whole repository. I will not look for project folders.

## **VERY IMPORTANT**

If you do not provide videos of your project you will get a zero.

If you do not provide a link to your project folder in GitHub you will get a zero.

For full credit your project must be 100% done and working. I will give partial credit if a project is mostly 85 - 90% done, but other than that it is a zero. Also, incomplete projects will get no better than a 89% but may get less.
